Technical Task

Scenario 1 (**Verify that user cannot log in with valid but not registered email**)

- Go to https://www.amazon.eg/
- Verify user can't login with valid but not registered email

Scenario 2 (**Verify that Items are added to cart correctly**

- Go to https://www.amazon.eg/
- Click on All tab
- Go to Today's Deals
- Click on 2nd category
- Click on 1st product in this category
- Click on 2nd item in this product
- Add it to cart with Qty = 2
- Do all the necessary actions to add the item to the cart
- Go to cart
- Verify correct items are added to the cart (name, price, qty and subtotal is correct)

Scenario 3: (**Verify that you cannot see "Your Orders" and "Your Addresses" pages if you are not logged in. But you can see "Your Lists" intro screen)**

- Go to https://www.amazon.eg/
- Click on "Hello, sign in Account & Lists" at the top right corner
- Select "Your orders"
- Make sure user can't see orders when not signed in
- Select "Your Addresses"
- Make sure user can't see orders when not signed in
- Select "Your Lists"
- Make sure user can see the screen

Make sure:

1. Assertions are present for each scenario
2. Report is generated after test run (you can use any report)
3. Screenshots are added when test is failed (You can intentionally fail the test case tocheck this)
4. Please write detailed steps how to execute tests with report in README.md
